

Guide on Research & Development (R&D) Tax Credits

R&D is the set of innovative activities undertaken by businesses in developing new services or products, and improving existing ones. The following questions will help you confirm if you could be eligible to claim R&D Tax Credits.

Has your company undertaken any of the following work within the last 2 or 3 years?

- 💡 Tried to develop or design a new or improved product?
- 💡 Produced prototypes, mock-ups or samples as part of its work?
- 💡 Performed any form of technical or scientific problem-solving?
- 💡 Failed to overcome a technical problem the first time or had to abandon a project for technical reasons?
- 💡 Sought to design systems or products to overcome limitations in existing technology?
- 💡 Undertaken any form of technical testing on a product or solution?
- 💡 Had difficulty in trying to integrate/combine different systems or components?
- 💡 Developed new or improved processes or systems, e.g. to make them more efficient?
- 💡 Sought to improve the performance or the specification of an existing product?
- 💡 Tried to develop a clever solution to a technical problem?
- 💡 Had difficulty meeting a customer's technical requirement on a contract or tender?
- 💡 Undertaken specialist design work involving technicians/engineers/scientists/developers?
- 💡 Developed complex software systems in-house or involving the use of external consultants?

If the answer is 'yes' you could be eligible to claim.

**We have recently helped a client whose total qualifying expenditure of £193,000 has seen nearly £60,000 R&D tax relief claimed.*
